The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tindell.

Tindell shows an assembly tool having a fitting fixture 35. The fitting fixture includes a flange 36. The opposite flange 36 may be termed a selectively adjustable retaining member for securing the fitting against the flange. The fitting fixture includes a threaded receptacle for securing the fitting fixture to the assembly tool driving member 9. The end portion(s) of the fitting fixture including the aperture(s) for receiving member 2 may be termed a guide member integral with the remainder of the receptacle. The Tindell fitting fixture is seen to be capable of performing the intended use recited in the claims.

Claims 1-5 and 8-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/26/05.
